

## PRESS RELEASE

### VR CINEMA: THE RETURN !

The Strasbourg European Fantastic Film Festival and its partners – the Shadok, Seppia Interactive and VRrOOm – are back on 23 April to kick off an innovative second season of virtual reality films. Six evenings of bold 360° experiences will run from **23 April to 5 December** at the Shadok.

Season 1 brought over 300 viewers to the Shadok to relish 22 VR films from 10 countries – enabling them to live “Asian dreams”, discover “women’s destinies” and take part in a “focus on dance”. Tantalising themes which enticed viewers to leap across the threshold of reality into a multitude of new virtual worlds.

VR cinema is moving forward with vertiginous speed, making the solitary viewing experience a thing of the past. Today’s viewers are connected to a network, which submerges them simultaneously into a collective experience of a 360° universe. And thanks to our new Oculus Go nomad headsets, **season 2 promises to be brighter, more intense and more immersive than ever.**

So get comfy in your swivel chair, fasten your Oculus Go and rush headlong into the new worlds that await.
