

## 23 APRIL

### VR PROGRAMME

### SPACE EXPLORERS

Season 2 will kick off with a big bang, bringing you three short VR films about space exploration, and which share a common thread with Shadok's 2019 "Hier c'était demain: science fiction et imaginaires collectifs".

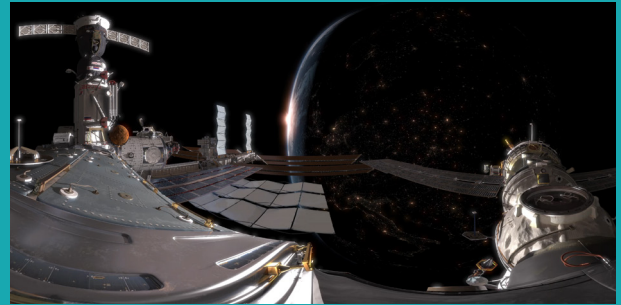

Get your Oculus Go headset out and plunge head first into adventures that will take on an early Soviet space mission and an interstellar trip with Thomas Pesquet.

### THE SPACEWALKER (4min)

Russian Federation | Director: Alexandre Gorokhov  
Producer: CGF Studio, Bazelevs

*The Spacewalker* is about man's first walk in space. You'll relive the breath-taking historic Soviet space mission which skirted disaster in 1965, with cosmonaut Alexei Leonov.

### DANS LA PEAU DE THOMAS PESQUET - PARTIE 1 (15min)

France | Director: Pierre-Emmanuel Le Goff and Jürgen Hanse  
Production: La Vingt-Cinquième Heure  
Coproduction: Prospect TV, France Télévision, DV Group

In the Nasa's training centre in Houston, be the first to watch astronaut preparation tests for travelling to space with a chance of a lifetime guide: Thomas Pesquet. You'll undergo centrifuge training, International Space Station (ISS) simulation exercises and take a dive into a gigantic pool with Pesquet, used to simulate walking in space.

### DANS LA PEAU DE THOMAS PESQUET - PARTIE 2 (15min)

Thomas Pesquet realises his childhood dream. You'll be with him as he prepares to travel to the ISS. Relive first hand Soyuz's blast off and arrival. And the first 360° images ever filmed in space will enable you to explore it and admire the Earth from the observation dome, before taking a walk into the void.
